### **Lau: Information Sharing in Supply Chains**

Improving the Performance of Collaboration

2007, XIV, 264 Seiten, mit einigen Abbildungen, kartoniert, Euro (D) 49,95, ISBN 978 3 503 09727 2

2007, XIV, 264 pages, with illustrations, softcover, USD 73,00/ GBP 41,00, ISBN 978-3-503-09727-2

This monograph by Jason Shiu Kong Lau aims at investigating appropriate levels of information sharing, which can yield benefits close to full information sharing. The book deals with the investigation of appropriate levels of information sharing; the associated coordination methods in three supply chain problems: inventory replenishment, distributed project scheduling and rescheduling; the establishing of a framework for investigating impacts of sharing production information among enterprises in supply chains. Through the use of multi-agent-based approach to modeling supply chains, this book shows that appropriate levels of information sharing performs close to, or even better than full information sharing. This work provides insights to improve performance of the supply chains in which full information sharing and centralized problem solving are not practical. With the aid of Internet and multi-agent technologies, practitioners in small and medium-sized enterprises can reduce barriers and costs of sharing information and, hence, implementing supply chain management.

**Waldner/Weiermair/Pérez (Ed.): Innovation and Product Development in Tourism**

Creating Sustainable Competitive Advantage

2007, VIII, 170 Seiten, mit Abbildungen, kartoniert, Euro (D) 34,00, ISBN 978 3 503 09079 2

2007, VIII, 170 pages, with illustrations, softcover, USD 50,00/ GBP 28,00, ISBN 978-3-503-09079-2

For the tourism and leisure industry innovation is one of the key factors of sustainable competitive advantage. Therefore it is astonishing that especially the tourism and leisure industry has for a long time underperformed in the field of innovation relative to other branches. Today it faces an innovation gap notably vis-à-vis ever increasing expectations of its customers. By closing this gap you could obtain strong competitive advantages for your tourism business or your destination. But innovation in tourism is a difficult and complex task. It is a serious strategic task. This volume written by international experts in tourism closes the gap between the available knowledge on innovation and its transformation into innovative products and services in tourism. The user gains central insights for the driving forces of innovation. The book shows how the spatial distribution of tourism enterprises, the degree of rivalry or cooperation, the closeness to resources and the clients are affecting innovations.

The new book edited by Klaus Weiermair, Harald Pechlaner and Thomas Bieger explains important current and future expected developments in leisure and tourism behaviour because of changes in time allocation. It shows for a deep understanding the main overall forces, which will have strong impacts on new time patterns. Well-known experts in the field of leisure and tourism will discuss all important influences and the outcomes in the areas of education and leisure time, working time and leisure, leisure time and recovery, wellness and entertainment, impacts on mobility and technology, e-tourism. With the various contributions readers will gain fundamental insights how changes in the allocation of time will remodel the leisure and tourism industry. They will learn how leisure and tourism markets will function in the future because of changing time patterns. Therefore this volume offers highly practical and also strategic results.

The author develops a model in which the CVA and the EVA are derived in the context of a free cash flow valuation of the firm. The model allows a systematic and quantitative discussion of two major sources of bias in value-added measures: inflation and the use of net capital for the EVA framework. This also includes a quantitative analysis of effects, and a „laboratory environment“ for follow-up research.

Grundlagen der Anglistik und Amerikanistik (GrAA) Band 29

Seit langem besteht in der Fremdsprachendidaktik Übereinkunft darüber, dass durch einen umfassenden Vergleich von Muttersprache und zu erlernender Fremdsprache neue Grundlagen für den Fremdsprachenunterricht und das Studium einer Fremdsprache geschaffen werden können. Der wichtigste Teil dieses Programms der kontrastiven Linguistik, nämlich das Erstellen von umfassenden, detaillierten Bestandsaufnahmen der wesentlichen Kontraste zwischen zwei Sprachen, ihrer Zusammenhänge und ihrer Erklärungen, wurde bislang nicht realisiert. Das vorliegende Buch schließt diese Lücke, indem es einen feinkörnigen Sprachvergleich des Deutschen und Englischen vorlegt, der auf zahlreichen kontrastiven Untersuchungen der Autoren, auf der einschlägigen Literatur zu den beiden Sprachen und auf den verfügbaren sprachtypologischen Einsichten aufbaut.

This book is the very first attempt to describe the development of environmental law. In particular, those developments under the auspices of the Environmental Law Programme of the International Union for the Conservation of Nature and Natural Resources, and within the network of the International Council of Environmental Law and all concerned national and international agencies and organizations. With its comprehensive treatment of the subject at national, regional and global levels, this publication shows how decision-makers were supported with information, legal analysis, advice, drafting of legal provisions, and capacity building, leading to the maturation of environmental law and its interconnection with sustainable development.

The idea of German Environmental Law in English is to be just that: a handy-sized, up-to-date, English-language-version of the legislation for the protection of the environmental currently in force in Germany. Its main objective is to make this body of law accessible to non-German speakers, students and professionals alike. The collection comprises the principal laws addressing the protection of the environmental media air, soil and water, and of natural landscapes and habitats with their flora and fauna, as well as laws of a more general scope, e.g. those regulating liability in cases of harmful impacts on the environment, or providing for public access to relevant data in such cases. (Legal status 2002).

In diesem Buch werden Potentiale zur weiträumigen Verteilung (Ferntransport) und zur schweren Abbaubarkeit (Persistenz) für die Bewertung und Zulassung von Pflanzenschutzmittelwirkstoffen und Industriechemikalien in internationalen Abkommen und der europäischen Gesetzgebung veröffentlicht, um der Forderung des nachhaltigen Umgangs mit umweltgefährlichen Stoffen besser gerecht zu werden. Zur Analyse wurde für die Persistenz die „Gesamtaufenthaltszeit“ und für den Ferntransport die „Charakteristische Transportdistanz (CTD)“ eingeführt, die beide den multimedialen Transport und Abbau berücksichtigen.

This edition publishes potential for long-range transport and persistence for the evaluation and regulation of plant protection products and industrial chemicals in international agreements and within the European legislation. The inclusion of these criteria was proposed in order to achieve a sustainable and precautionary use of chemicals of environmental relevance.

In dieser Veröffentlichung werden kriegsrechtliche Bestimmungen mit Umweltbezug und sonstiges Völkerrecht auf ihre Hinlänglichkeit für den Umweltschutz untersucht. Der Autor legt in englischer Sprache dar, dass das geltende Völkerrecht derzeit wenig geeignet ist, um kriegsbedingte Umweltauswirkungen zu regulieren.

While in times of peace a growing number of multilateral environmental agreements serves to protect the environment, existing international law affords only very limited protection against the threats of war to the environment. This is the finding of a study by Prof. Daniel Bodansky,

2003, 564 pages, softcover, USD 84,00/ GBP 47,00, ISBN 978 3 503 07429 7

In dieser Veröffentlichung wird das Verhältnis von multilateralen Umweltabkommen und Welthandelsrecht unter besonderer Berücksichtigung der Streitbeilegungsmechanismen untersucht und Vorschläge zur Problemlösung unterbreitet. Der erste Teil enthält eine Analyse der bestehenden materiellen Regelungen und Streitbeilegungsmechanismen der WTO und der multilateralen Umweltabkommen sowie der daraus resultierenden Überschneidungen. In Teil Zwei werden insgesamt neun Streitfälle betrachtet, die den Grenzbereich Umwelt und Gesundheit / Handel betreffen und von dem WTO Streitbeilegungsgremium entschieden worden sind.

An important issue concerning both ongoing and completed negotiations and discussions about multilateral and regional trade agreements is, whether and how liberalized of "free" trade can be reconciled with environmental protection. The study undertakes to present an objective evaluation of the problems at issue. Likewise, the proposed solutions will encompass the interests and considerations of both the trade and environmental constituencies. However, a premise of the study is that environmental concerns are underrepresented on the international level in comparison to trade interests, in particular with respect to dispute settlement issues. Proposal and conclusions are generally aimed to strengthen environmental policies.

The importance of non-governmental organisations (NGOs) in international environmental co-operation has increased tremendously over the last decades. Accordingly, the participation of non-governmental actors has become a prominent subject for research, especially in the legal and social sciences. However, limited effort has been spent at systematically analysing the relationship between the legal basis and the practical influence of NGOs in different areas of international environmental co-operation. This study first laid a conceptual basis by reviewing existing definitions of NGOs and developing an own working definition, elaborating the functions NGOs perform in international environmental policy-making and examining various criteria that can serve to distinguish different types of NGOs.

im Rahmen eines Forschungsprojekts des Umweltbundesamtes vom Institut für Ressourcenmanagement der Universität Gießen ein Modellierungs-Werkzeug entwickelt worden. Mit Hilfe von DRIPS können auf nationaler Ebene einzugsgebietspezifische Anfangskonzentrationen (Predicted Environmental Concentration in surface waters, PEC<sub>sw</sub>) für PSM-Wirkstoffe ermittelt werden. Das Buch veröffentlicht Informationen zum Modell in englischer Sprache.

The objective of this study was the development of a Decision Support System (DSS) software tool, termed DRIPS (Drainage-Runoff-Spraydrift Input of Pesticides in Surface Waters) designed to estimate catchment specific PEC<sub>sw</sub> resulting from non-point source inputs of the major pesticides applied on Germany's arable land. The book published information to the model in English language.

2002, 495 pages, softcover, USD 27,00/ GBP 13,00, ISBN 978 3 503 07004 6

Das Buch ist die englische Übersetzung des seit April 2002 als deutsche Ausgabe lieferbaren Werkes "Nachhaltige Entwicklung in Deutschland. Die Studie vertieft nicht nur die bereits 1997 untersuchten Bereiche Energie, Nahrungsmittelproduktion, Mobilität, Stoffstrom-management und Konsum, sondern widmet sich auch weiteren Handlungsfeldern wie dem Tourismus, der industriellen Produktion und der Ressourcenschonung.

At the United Nations Conference on Environment and Development held in 1992 in Rio de Janeiro, the international community agreed to the concept of sustainable development, and established Agenda 21 as a global action programme for the 21st century. The study reviews the past five years and discusses further steps by business and society towards sustainable development. The study not only takes a closer look at those areas that were examined in 1997, i.e. energy use, food production, mobility, material flow management and consumption, but also addresses other areas such as tourism, industrial production and the conservation of resources.

2005, XXVIII, 586 pages, Softcover, USD 98,00/ GBP 55,00, ISBN 978 3 503 09023 5

Transboundary environmental damage is on the increase internationally. Sectoral environmental liability regulations exist for many areas, such as the protection of the marine environment, water protection or oil spills. However, their conditions for liability often vary, which in some fields may lead to regulatory disparities or regulatory gaps. The authors have compiled and analysed a large part of existing international environmental liability regulations, which in the majority of cases are based on multilateral environmental conventions and jurisdiction. The study also compiles key components of existing international, European and national liability systems and identifies the main elements of consistent international environmental liability. According to the authors, the subsidiary and supplementary responsibility of states which is embodied in European law can be used to improve liability systems. This envisages a liability of states where they fail to transpose international environmental protection regulations into national law and do not reduce the risk of environmental damage. The principle that the polluter is liable for environmental damage he or she has caused would thus apply not only to private persons, but also to the public sector and states.

Die Einführung widmet sich in einzelnen Kapiteln dem in den letzten Jahren stark expandierenden Bereich der sogenannten ‚New Literatures in English‘, die einen beträchtlichen Teil der literarischen Produktion in der englischsprachigen Welt ausmachen. Die einzelnen Kapitel führen am Beispiel ausgewählter Interpretationen in die jeweilige Literatur des Landes oder einer bestimmten Region ein, so etwa zur „South African Literature“, „Indian Literature“, „Australian Literature“ oder „New Zealand Literature“. Kommentierte Leselisten, ausführliche Literaturhinweise sowie Internet-Adressen runden den Band ab.

‚New Literatures in English‘ presents seven original essays by leading scholars on one of the most exciting and rapidly expanding areas of literary and cultural studies. The present collection wants to remedy the deficiency literary interpretations of keytexts by offering stimulating and wideranging interpretations of important and influential texts from different genres together with concise information on the diversity and richness of postcolonial literature in general.
