**Handbook of Low Cost Airlines**
*Strategies, Business Processes and Market Environment*
Edited by Prof. Dr. Sven Groß and Alexander Schröder
2007, 319 pages, with numerous illustrations, Euro (D) 49,95 / USD 63.–. ISBN 978 3 503 10081 1

This book pools the knowledge of experienced and renowned experts and explains:
- what tools and (technical) instruments allow low cost airlines to offer such inexpensive fares while (often) being cheaper than the traditional airlines
- how demanders react to these new flight services
- what specific legal issues customers should be aware of when using low cost airlines
- what impacts low cost airlines have on the air traffic business as a whole, on source and destination areas as well as on ecological and economic aspects
- how cooperation partners and competitors respond and with what result new cooperation partnerships are entered into
- what future developments of low cost airlines can be expected and how other transport companies adopt the low cost strategy as well.

Productivity in Tourism
Fundamentals and Concepts for Achieving Growth and Competitiveness
Edited by Prof. Dr. Peter Keller and Prof. Dr. Thomas Bieger
2007, VI, 252 pages, Euro (D) 49.95 / USD 63,–. ISBN 978 3 503 10343 0

What is productivity in the field of tourism? Can information technology and multi-factor productivity help to overcome the cost disease in small businesses in the tourism sector? Can the government influence productivity?

This book, edited by Peter Keller and Thomas Bieger, provides an integrated analytical framework for understanding and improving productivity in tourism.

Issues in the book are
➤ the labour productivity problem and possibilities for rationalisation in labour-intensive businesses
➤ trade-off between quality and productivity
➤ information and communication technology and productivity
➤ optimal firm size and cooperation for productivity
➤ the role of government and tourism policy to improve productivity.

Expert information for practical use:
This work contains highly qualified contributions from 32 leading researchers from 10 countries. They are empirically founded with a background of many practical cases. You will find fundamental insights, which drive to new solutions in business and new research in the field.

For the tourism and leisure industry innovation is one of the key factors of sustainable competitive advantage. Therefore it is astonishing that especially the tourism and leisure industry has for a long time underperformed in the field of innovation relative to other branches.

Today it faces an innovation gap notably vis-à-vis ever increasing expectations of its customers. By closing this gap you could obtain strong competitive advantages for your tourism business or your destination. But innovation in tourism is a difficult and complex task. It is a serious strategic task.

With this book you gain central insights for the driving forces of innovation. You learn

➤ how to organize your company to get ready for innovations
➤ how to realize new tourism experience products
➤ what the effects of Information and Communication Technologies are on innovations
➤ how to introduce new products into your company and the market
➤ how the roles of the customers, suppliers, competitors and the state are affecting innovations.
