Global Logistics Management

Sustainability, Quality, Risks

Edited by
Wolfgang Kersten, Thorsten Blecker, and Heike Flämig

With Contributions by

ERICH SCHMIDT VERLAG
# Table of Content

Preface .............................................................................................................................. V

Table of Content............................................................................................................. VI

## I. Logistics in a Global Context

Transfer Pricing, Taxation and Capacity Planning in International Manufacturing Networks.......................................................................................................................... 3

*David Francas*

Bringing regional networks back-into global supply chains: Strategies for logistics service providers as integrators of logistics clusters .............. 21

*Hans-Dietrich Haasis and Ralf Elbert*

System Dynamics Analysis on the Evolution of Logistics Cluster: An Empirical Analysis Of Logistics Networks And Nodes In Yangtze River Delta of China........................................................................................................... 33

*Ma Lin and Tong Huan*

Holistic Security in Global Supply Chains - A Strategic Framework.............. 45

*Andreas Wieland and Helmut Baumgarten*

Logistics in the Context Of Internationalisation – How Chinese and German Companies Enter Foreign Markets........................................... 59

*Frank Straube, Michael Bohn, and Daniel Rief*

## II. Sustainability in Logistics

Future Scenarios 2030: The Contribution of Logistics to a Sustainable Development......................................................................................................................... 75

*Christian W. Flotzinger and Hannelore Hofmann-Prokopczyk*

Design of an Environmental Supply Chain Network: A Biosolids Waste Case Study ......................................................................................................................... 87

*Adel Al-Mansi, Hatem Aldarrat, Fathi Rhoma, Alexander Goudz, Matthias Lorenz, and Bernd Noche*
Biogas Logistics Supply Chain Network Design: A Framework Model...... 99
Fathi Rhoma, Hatem Aldarrat, Adel Al-Mansi, Alexander Goudz, and Bernd Noche

Reasons for the Slow Development of Reverse Logistics in the Electronic Industry of China................................................................. 113
Charles Lau

III. Risk and Quality Management in Supply Chains and Logistics

Quality Management Impacts on Logistics Networks measured by Supply Chain Performance Indicators.................................................. 129
Matthias Klumpp and Manja Ostertag

A Conceptual Approach for Quality Improvements in Project-Oriented Supply Chain Networks................................................................. 149
Herwig Winkler, Hubert B. Schemitsch, and Bernd Kaluza

Impact Of Supply Chain Quality Management on Competitive Advantage and Organizational Performance .............................................. 171
Deepak Barman, Gyaneshwar Singh Kushwaha, and Debadyuti Das

Supply Chain Risk Management for Robustness in a Logistical Framework.......................................................................................... 187
Inga-Lena Darkow and Heiko Wöhner

Container Logistics Networks under Context Diversity ............................... 205
Bernd Scholz-Reiter, Kateryna Daschkovska, and Enzo Morosini Frazzon

Risk and Capacity Management in Logistics Networks: The Example of Global Container Operators ..................................................... 223
Stephan Zelewski, Matthias Klumpp, and Susanne Hohmann

Logistics Services: Theoretical and Empirical Findings on Quality Perceptions..................................................................................... 239
Wolfgang Kersten and Jan Koch

IV. Product Induced Logistics Strategies

Tobias Held
